CENTURY PEAK HOLDINGS CORPORATION**

**PART I - FINANCIAL STATEMENTS**

***Item 1. Financial Statements and General Disclosures***

***a. Financial Statements***

A copy of the unaudited consolidated financial statements of Century Peak Holdings Corporation (“CPM” the “Issuer”, the “Corporation”, the “Company” or the “Parent Company”) and subsidiaries (collectively known as the “Group”) as at and for the nine months ended September 30, 2023 is attached as **Annex 1**.

The copy of the audited financial statements of the Issuer as at and for the year ended December 31, 2022 is attached to the Definitive Information Statement of the Issuer as **Annex 2**.

***b. Assets***

The following significant items comprise the Group’s assets as at September 30, 2023.

**Property, Plant and Equipment**

The carrying value of property and equipment amounted to P8,320.9 million and P8,390.3 million as at September 30, 2023 and December 31, 2022, respectively.

This account includes mine site development costs referring to costs incurred in the construction of road network, pier and stockyard, and cement plant construction in progress which includes the costs for the construction of the plant facilities, buildings, machineries and equipment, and pier.

Measurement and recognition of the mine site development costs refer to those of property and equipment being used to develop and maintain Century Peak Corporation’s (“CPC’s”) mineral right property in Casiguran Property which has indicated various degrees of nickel mineralization. CPC is one of the wholly-owned subsidiaries of the Company.

Measurement and recognition of the cement plant construction in progress, on the other hand, represents the construction and other direct costs incurred in relation with the Cement Plant Project of Century Peak Cement Manufacturing Corporation (“CPCMC”) located in Cebu and other facilities under construction in Leyte for Century Hua Guang Smelting Incorporated (“CHGSI”) smelting plant. CPCMC is one of the wholly-owned subsidiaries while CHGSI is 55%-owned subsidiary of the Company.

Construction in progress is stated at cost and is not depreciated until such time that the relevant assets are completed and put into operational use but tested for impairment losses. Assets under construction are transferred to the related property and equipment account when the construction and installation and related activities necessary to prepare the property and equipment for the intended use are completed and the property and equipment are ready for services.

Mine site development costs, transportation and field equipment were part of the group of assets acquired. These assets are initially recognized in the consolidated statement of financial position based on allocation of the total acquisition cost using their relative fair value.

### **Explored Mineral Resources**

Explored mineral resources are part of the group of assets of CPC that were acquired in 2008, in exchange for shares of stock of the Parent Company. At acquisition date, these explored mineral resources were measured based on the expected cash flows from the explored area of about 400.0 hectares or 42.0% of total area covered by the MPSA.

The financial model yielded an expected NPV on CPC's group of assets amounting to P2.0 billion using an investment hurdle rate of 36.6%. The NPV computation assumed an average selling price of USD 27,500.0 per metric ton of pure nickel, which considered a 16.2% discount to London Metal Exchange quoted prices; a 15-year production and selling period with a maximum annual production yield of 2.0 million metric tons; and an average production cost of USD 6.4 per wet metric ton. The valuation was prepared by Asian Alliance Investment Corporation (AAIC), an independent financial advisor. Subsequently, the Parent Company appointed Multinational Investment Bancorporation (MIB), another independent financial advisor, to render fairness opinion to the valuation. The result of MIB's report dated April 9, 2008 fairly approximated that of AAIC's report.

For purposes of computing the net present value using discounted cash flow method, the valuation of intangible assets involves the extraction of non-replaceable resource.

The assumptions used in the valuation included a number of market factors that are subject to market risk, such as commodity risk and currency risk. Significant changes in the commodity prices and foreign exchange rates would affect the fair value of the explored mineral resource.

The carrying value of explored mineral resources amounted to P1,365.9 million and P1,423.7 million as at September 30, 2023 and as at December 31, 2022, respectively.

### **Deferred Tax Assets**

The Group's deferred tax assets in the consolidated statement of financial position as at September 30, 2023 and December 31, 2022 amounted to P8.6 million.

### **Other Noncurrent Assets**

The other noncurrent assets pertain mainly to the non-current portion of deferred input VAT and funds to promote the welfare of inhabitants, amounting to P102.7 million and P73.9 million as at September 30, 2023 and December 31, 2022, respectively.

Rehabilitation funds were set up by the Group to ensure availability of financial resources for the satisfactory compliance with and performance of activities of its Environmental Protection and Enhancement Program during the specific phases of its mining projects. The funds also include a Social Development Management Program fund under a Memorandum of Agreement with the Development Bank of the Philippines (DBP).

The Group's rehabilitation funds are deposited with DBP and earn interest at the respective bank deposit rates.

Investment in equity securities pertains to the Parent Company's ownership interest in Century Peak Hotel Management and Development, Inc. formerly known as Century Peak Property Development, Inc. which is measured at fair value.

## **c. *Liabilities***

### **Accounts payable and other current liabilities**

The Company's accounts payable are usually paid within one year. Contractor's fees pertain to outstanding payables to previously engaged contractor. Such amount is being negotiated by both parties. Others include statutory payables, accrued salaries and various items that are individually immaterial.

### **Related Party Payables**

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control, or are controlled by, or under common control with the Group, including holding companies, subsidiaries and fellow subsidiaries are related entities of the Group. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Group that gives them significant influence over the enterprise, key management personnel, including directors and officers of the Group and close members of the family of these individuals and companies associated with these individuals also constitute related entities. Transactions between related parties are accounted for at arm's-length prices or on terms similar to those offered to nonrelated entities in an economically comparable market.

In considering each possible related entity relationship, attention is directed to the substance of the relationship, and not merely the legal form. Significant related party transactions represent mainly availment of non-interest-bearing advances from a stockholder for working capital purposes. As at September 30, 2023 and December 31, 2022, the total outstanding advances from a stockholder amounted to P5,922.2 million and P6,388.6 million, respectively. The advances are payable on demand.

## *Item 6. Plan of Operations*

### *Mining Operations*

CPC has mining activities in selected areas covered by its MPSA in the province of Dinagat Islands.

There are two Geologic Resource Evaluation Reports for the Casiguran Nickel Project and a Resource Evaluation Report for the Rapid City Parcel II Prospect, which were prepared by Dr. Carlo A. Arcilla, an accredited competent person in accordance with the definition of the Philippine Mineral Reporting Code.

Based on the reports, the Casiguran Nickel Project and Rapid City Parcel II Prospect have a combined indicated and measured resource of 9,897,000 DMT with a grade of 1.02% nickel (at 0.8% nickel cut-off) and 9,067,000 DMT with a grade of 1.07% nickel (at 0.8% nickel cut-off), respectively. These represent 100,000 metric tons of pure nickel and 3.5 million tons of iron and 90,000 tons of pure nickel and 3.8 million tons of iron for the Casiguran Nickel Project and Rapid City Parcel II Prospect, respectively, subject to mining plans and metal recovery parameters.

Management looks forward to continue developing and exploring these mineral properties either on its own or with joint venture partners.

### *Mineral Rights of CPC*

MPSA-010-92-X or the "Casiguran Nickel Project," was acquired by CPC from Casiguran Mining Corporation by virtue of a deed of assignment on May 29, 2006, which was approved by the Department of Environment and Natural Resources (DENR) on December 11, 2006. On May 6, 2017, CPC's MPSA No. 010-92-X expired. The DENR approved the renewal of this MPSA on October 12, 2022 for another 25 year term commencing from June 11, 2017.

In addition, MPSA-283-2009-XIII-SMR or the "Rapid City Parcel II Prospect" ("Rapid City") was approved by the DENR on June 19, 2009. This MPSA has a term of 25 years from effective date.

The Acoje Property is covered by APSA-086-XIII and Environmental Compliance Certificate (ECC) No. 008-345-301C. APSA-086-XIII was applied with the MGB on July 5, 2004. APSA-086-XIII is still under final evaluation with the Mines and Geosciences Bureau (MGB) Central Office, and this is currently under process.

On May 25, 2021, Crau assigned its rights over its portion of the mineral properties to the Company for a consideration.

On November 21, 2021, Crau submitted a letter of intent to convert the pending application for Production Sharing Agreement to Exploration Permit Application.

APSA-086-XIII is still under final evaluation with the MGB Central Office as at September 30, 2023.

### *The Smelting Plant Project*

The Group's smelting plant project, which is to be undertaken through its subsidiary CHGSI, is located at Leyte Industrial Development Estate - Special Economic Zone (LIDE-SEZ) in Isabel, Leyte. The Environmental Compliance Certificate for the smelting plant project was issued last April 16, 2010. Initial civil works have been undertaken on the smelting plant. However, in late 2013, typhoon Yolanda wrought massive devastation in Leyte Island, significantly impairing the value of CHGSI assets in Leyte. Despite this, the company is optimistic that it will be able to pursue operations in the future as negotiations with investors and technology partners are ongoing.

Also, on November 9, 2010, CHGSI has received its Amended Environmental Compliance Certificate (ECC), with Reference Code 1003-0011 issued by the Environmental Management Bureau (EMB), Central Office, to include the installation of a Coking Coal Plant to be located at the LIDE-SEZ.

On March 1, 2011, CHGSI's application with PEZA for its proposed Coking Coal Production Project was approved. The Company's Coking Coal Plant project will be a support system to its Ferro-Nickel Smelting Plant. It is CHGSI's approach to making the Ferro-Nickel Smelting Plant as self-sustaining as possible. On the same date, CHGSI entered into a Supplementary Agreement with PEZA for the project timetable of its coking coal production in LIDE-SEZ, in which commercial operations will start from July 2011 to July 2012. CHGSI has requested for an extension of such timetable.

As at September 30, 2023, the Group is still waiting for the response from PEZA.

### *The Shipping Company*

The Company entered into a partnership with Sidewide Resources (H.K.) Limited, a subsidiary of Chaoyang Saiwai Mining Co., Ltd. Of P.R. China. This group owns an Iron Powder Processing Plant, Electric Furnace Smelting Plant, and primarily does trading of mineral ore. They have offices in Beijing, Shanghai and Hong Kong. It is the Company's plan to set up electric furnaces in the future to enhance the production of its nickel pig iron. From this formed partnership, CSSI is incorporated.

As at September 30, 2023, CSSI has not yet started with its commercial operation.

### *The Cement and Limestone Project*

Through a Joint Operating Agreement (JOA) executed between Philippine Mining Development Corporation (PMDC) and CPC dated November 18, 2010, with a term of

25 years, the Group has 4,795 hectares in Pinamungahan, Cebu to mine limestone. An initial resource assessment conducted in 2012 on an 81-hectare area estimate as indicated limestone resource of 34,000,000 metric tons.

In April and July 2015, the Group was able to obtain the ECC for the Cement Plant/Power Plant and Limestone Quarry Project, respectively.

On September 29, 2015, through a Deed of Assignment executed between CPC and CPMDC, CPC assigned its rights over the JOA with PMDC to CPMDC. Through the assignment, CPMDC will handle the Pinamungahan Limestone Quarry Project and will take over from CPC the implementation of its obligations and commitments under the subject JOA.

On July 10, 2019, the MGB approved the Declaration of Mining Project Feasibility (DMPF) under the JOA. The approval shall authorize CPC to proceed to the development and operating periods under the JOA by and between PMDC and CPC including the extraction and commercial disposition of limestone, pozzolan and other associated minerals in the entire contract area.

On March 20, 2022, the transfer of ECC from CPC to CPMDC was approved by the Environmental Management Bureau of the Central Office.

The Cement Project has started commercial operation in February 2023.
